

## Mallory 427 Distributor Caps - What's The Difference?

August 24 2012 at 12:33 AM Keith Ferrio

---

Many of you may know this already, but for those who don't, Mallory sells the flat/crab style distributor cap for the 427 under two different part numbers. They are "Mallory 221B" and "Mallory Marine 9-29416". Here is some further evidence that both part numbers are the same physical product. Despite having the Mallory tech rep swear they were the same, I had to buy one of each just to check it out for myself.

As you can see from the two boxes, both part numbers are cross referenced. However, there is one big difference and that is the price for each cap. The 221B cap is \$39 while the 9-29416 is \$54, a \$15 dollar premium for the "Mallory Marine" version (prices from Summit Racing).
