

1985 422 Prop and Performance data

I have a 1985 Chris Craft 422 with Detroit Diesel 550 hp 6V92 TA's and Allison 2:1 gears with 2" shafts, my props are 4-blade 29"x 35" pitch. I do not have trolling valves on the gears. My performance cruising at 1910 rpm's is 19.5 knots or 22.4 MPH with a clean bottom and approximately 400 gallons of fuel. My engines turn aprox. 2400 rpm' s WOT while underway but I don't have the actual speed at this rpm, I do not run up to WOT except for just a short while on the way back in to port.
