

## Commander Paint and Gelcoat colors 2026

Jeremy Goldstein

March 8, 2026

The code for the commander offwhite that was matched from my boat for Chris Orphal's boat back in 2021 is what you'll need to give the people at Alexseal so they can mix up some paint for you. Commander Off White Code T9297

Heres their contact <https://www.alexseal.com/contact>

Keep in mind that every boat's gelcoat experiences the elements uniquely due to factors like fresh/ salt water, uv exposure, direction boat faces at dock, cleaning practices, waxes and compounds , etc. Also even from the factory there was slightly variations on the original gelcoat from one batch to another.

All that said , this paint color will get you very close to factory color if you choose to go with paint.

If you opt for gelcoat a great way to go is to contact MiniCraft <https://minicraft.com/> out of Wildwood Florida and order their Oyster White gelcoat (an original Awlgrip color) which is close in color but slightly lighter than the original Chris Craft color.
