

Chris-Craft **27'**
commander

Chryslercraftcommander.com

COPYRIGHT 1995, CHRIS-CRAFT CORPORATION

The 27' Commander hull starts with a sharply veed bow for a smooth entry through the water. The bottom sweeps gracefully into modified-vee planing surfaces. Longitudinal speed stabilizers provide superior control in turns and quartering seas. Additional stability is provided by the stepped chine, which also deflects spray. Note wide flare and marked flam in forward hullsides, which insure a dry ride.

FOB prices and specifications subject to change.
